## PROJECTS

---

### Sign-Ease [ Android-Kotlin, Hello-Sign API (Dropbox), FireBase ]

September 2022

- **Problem:** Digital Approvals in documents/leaves for hostel/college students
- **Solution:** Developed an Application for CRUD operations on Signature Requests with pre-built Templates and to the point information. It gets your requests signed by the respective authority seamlessly hence saving Time, Labour as well as Paper.

### Intelli-Tags [ Android-Kotlin, Modzy APIs, AWS ]

Dec 2021

- **Problem:** Instant Hashtags generator for blogs and media content for adequate promotion
- **Solution:** Built an Application using Modzy (now Smarty) ML models or APIs which analyses Media files like Text, Image and Video and instantly generates relevant Social Media Tags for your Content thus Boosting their Engagement and reach up to 2x globally.

### Feedback Prime [ Android-Kotlin ]

Oct 2021

- **Problem:** Smart Feedback Analysis for Support Engineers to avoid useless Feedback/Survey forms
- **Solution:** Using Symbl.ai Async API and Conversation-intelligence, created an app that analyses the Media file and processes it to Auto-generate a detailed Feedback Report of the Conversation that reduces manual work for both Engineers and the Customers.
